SUMMARY

Results-driven Data Engineer with over 8 years of experience architecting and implementing scalable data platforms across the telecommunications, banking, and retail industries. Proficient in both Google Cloud Platform (GCP) and Microsoft Azure ecosystems. Strong expertise in real-time streaming, Change Data Capture (CDC), data validation, and ensuring strict data quality across complex lakehouse architectures. Proven track record of developing automated testing frameworks, schema synchronization processes, and leveraging cloud-native tools to deliver secure, production-grade data solutions.

SKILLS

- **Programming Languages:** Python, Node.js (React), Pyspark
- **Data Engineering:** ETL Development, Data Pipeline Design and Implementation (Streaming & Batch), Data Modeling, Data Validation, Schema Synchronization, Data Profiling
- **Big Data Technologies:** Azure Databricks, Databricks Workspace API, Data Factory API, HD Insight, Unity Catalog
- **Cloud Services (GCP):** Dataflow (Flex Templates), BigQuery (Storage Write API, CDC), Cloud Bigtable, Secret Manager, Artifact Registry, Cloud Scheduler, Cloud Composer (Airflow)
- **Cloud Services (Azure):** Azure Data Factory, Azure Synapse Analytics, Azure Storage Account, Azure Key Vault
- **Stream Processing:** Apache Beam, Google Cloud Dataflow, Apache Kafka (Confluent Cloud, Schema Registry, Avro), Google Cloud Pub/Sub
- **Lakehouse & Storage:** Apache Iceberg, BigLake Metastore (BLMS REST Catalog), Google BigQuery, Google Cloud Storage, AWS S3 (Parquet)
- **Databases:** SQL Server, PostgreSQL, Hive, Teradata
- **Data Processing and Analysis:** PySpark, PySpark SQL, Kafka, Confluence
- **Infrastructure & DevOps:** Terraform (IaC), GitLab CI/CD, Docker, Kaniko, Jenkins, GitHub Workflow
- **CI/CD & Version Control:** Jenkins, Github Workflow, Git (GitHub, GitLab, GitHub Enterprise Cloud)
- **Testing, Automation & Scripting:** Unit Testing, Integration Testing, Test Scenario Definition, Automated Testing, Script Generation
- **Web Development & Web Crawling:** React, Next.js, Web Crawler Development
- **Data Security and Governance:** Role-Based Access Control (RBAC)
- **Interpersonal Skills:** Collaboration with Data Scientists and Marketing Teams, Technical Support and Troubleshooting, Ad-hoc Issue Investigation and Resolution

WORK EXPERIENCE

Data Engineer , **June 2017 - December 2018**
Advanced Info Services Public Company Limited (AIS)

- Explored data from various sources to support the Data Science team in training recommendation models and creating data chains.
- Gathered data using web crawlers to support new marketing campaigns.
- Implemented ETL processes with SQL/Hive.
- Participated in data requirements discussions with Data Scientists and the Marketing team.
- Implemented data flow, data pipeline, and data cleansing using Databricks.

Data Engineer , **January 2019 - March 2019**
Total Access Communication Public Company Limited (DTAC)

- Developed ETL jobs using Teradata, ensuring efficient data integration and processing capabilities.

Frontend Developer, **April 2019 - December 2019**
Zimple Media Company Limited

- Developed web applications and blogs using React, Next.js, PostgreSQL, and GraphQL.
- Defined and performed test scenarios to ensure robust and user-friendly applications.

Data Engineer, **January 2020 - December 2022**
The Siam Commercial Bank Public Company Limited

- Designed and implemented ETL and data pipelines.
- Implemented data ingestion processes.
- Performed unit testing and integration testing.
- Developed job scheduling routines to ensure data quality and availability for analytical purposes.

Data Engineer, **January 2023 - April 2025**
SCB Data-X

- Designed and developed data models using PySpark and PySpark SQL on Azure Databricks.
- Concluded data validation processes.
- Developed automated tests and generated scripts using PySpark, Databricks Workspace API, and Data Factory API.
- Designed and developed schema synchronization processes using PySpark on Databricks to ensure data consistency across databases and data warehouses.
- Conducted POCs for the Databricks data platform migration to new versions using Unity Catalog.
- Developed RBAC processes to enhance data security.
- Profiled data sources in Kafka and Confluence for integration into new platforms.
- Investigated and supported ad-hoc issues, collaborating with platform teams to troubleshoot and resolve issues promptly.

WORK EXPERIENCE

**Data Engineer (Consultant),
NTT DATA — Client: The 1 Central Group**

May 2025 - Present

- Architected and implemented real-time streaming and scheduled batch data pipelines on Google Cloud Platform, utilizing Apache Beam and Dataflow to process high-volume loyalty and sales data.
- Designed Change Data Capture (CDC) solutions to maintain near real-time data consistency across a two-layer lakehouse architecture comprising Apache Iceberg and Google BigQuery.
- Developed data ingestion frameworks capable of auto-detecting and normalizing multiple Kafka message schemas (JSON, Avro) into unified processing flows.
- Engineered event denormalization strategies to split complex nested payloads into optimized, clustered target tables for advanced analytics workloads.
- Provisioned and managed cloud infrastructure including BigLake Metastore catalogs, Google Cloud Storage, Artifact Registry, and BigQuery datasets using Terraform (IaC).
- Established multi-stage GitLab CI/CD pipelines to automate unit testing, Docker image creation, Terraform deployments, and Dataflow job submissions.
- Collaborated cross-functionally with infrastructure, analytics, and Kafka platform teams to align on schema design, query optimization, and platform security.

PROJECTS

Advanced Info Services Public Company Limited (AIS)

1. Recommendation Engine Project:
 - Profiled and explored data to support the Data Science team in training recommendation models.
 - Designed and developed pipelines to serve data for model prediction.
2. Churn Project:
 - Designed and developed pipelines to serve data for churn model prediction.

Zimple Media Company Limited

1. Propertyhub:
 - Developed the frontend web application for information assets (apartments and condos) using React and Next.js.
2. Blog RentHub:
 - Developed a web blog platform using WordPress.

SCB Data-X

1. Regulatory Data Transformation (RDT):
 - Designed and developed data models using PySpark and PySpark SQL on Azure Databricks.
 - Concluded data validation processes.
 - Developed automated tests and generated scripts using PySpark, Databricks Workspace API, and Data Factory API.
 - Designed and developed schema synchronization processes using PySpark on Databricks to ensure data consistency across databases and data warehouses.
2. Regulatory Data Transformation (RDT CardX):
 - Conducted POCs for the Databricks data platform migration to new versions using Unity Catalog.
 - Developed RBAC processes to enhance data security.
 - Profiled data sources in Kafka and Confluence for integration into new platforms.

PROJECTS

NTT DATA — The 1 Central Group

1. Real-Time Event Streaming Pipelines

- Designed end-to-end streaming pipelines to ingest Confluent Kafka events into a two-layer lakehouse (Iceberg and BigQuery), incorporating automated schema detection and CDC mechanisms.
- Tech Stack: Python, Apache Beam, Dataflow, Kafka (Confluent), Avro/Schema Registry, Iceberg (BigLake), BigQuery, Terraform, GitLab CI/CD.

2. Batch Data Ingestion Pipelines

- Developed batch ingestion processes utilizing Cloud Scheduler to extract daily incremental loads from REST APIs and PostgreSQL databases, optimizing downstream analytics with robust partitioning strategies.
- Tech Stack: Python, Apache Beam, Dataflow, PostgreSQL, Iceberg (BigLake), BigQuery, Cloud Scheduler, Terraform.

3. Customer Profile Streaming Pipeline

- Engineered a scalable streaming solution to process Pub/Sub events, enrich data via Cloud Bigtable lookups, and distribute refined profiles to multiple destinations including BigQuery (CDC), AWS S3, and Iceberg.
- Tech Stack: Python, Apache Beam, Dataflow, Pub/Sub, Bigtable, BigQuery, AWS S3, Iceberg (BigLake), Cloud Composer (Airflow).

EDUCATION

Bachelor of Science in Applied Mathematics

King Mongkut's Institute of Technology Ladkrabang

June 2013 - June 2016
